KARTIK ASWAL

PROFILE

Proficient in web development tools, including React and MySQL, and adapt at building mobile-responsive layouts using Tailwind CSS. Skilled in dynamic data display, user interactivity, and optimizing load times, with recent experience in enhancing mobile menu responsiveness and layout design for user-friendly applications.

WORK EXPERIENCE

Software Developer Intern | CodeBurnerz Technologies 10 MONTHS

- Gained hands-on experience in coding, debugging, and troubleshooting across multiple Laravel projects.
- Developed backend features using Laravel with service-repository patterns and efficient database handling.
- Designed responsive UI components with Tailwind CSS to enhance user experience.
- Built and launched functional web pages using React with responsive and interactive elements.
- Contributed to full-stack development using Laravel (backend), React (frontend), and MySQL (database).

Software Developer | Webreinvent Technologies Pvt. Ltd. PRESENT

- Developing backend logic and APIs using Laravel for scalable and maintainable applications.
- Customizing and extending VaahCMS for client and internal projects, including module enhancements.
- Building responsive front-end components with Vue.js for smooth user experiences.
- Collaborating with senior developers to implement full-stack features and resolve bugs.
- Working in Agile sprints and using Git for version control and team collaboration.

PROJECTS

Chat Web Application | React.js, Firebase

- Developed a chat application enabling seamless, real-time global message exchange to facilitate worldwide communication.
- Leveraged Google Firebase as the primary database solution for real-time message synchronization, user authentication, and cloud storage capabilities.
- Achieved efficient real-time data synchronization using Firebase Database, ensuring smooth and responsive user interactions across devices.

Yoga Website | HTML, CSS, JavaScript, Bootstrap

- Built a front-end yoga website providing users with comprehensive information on yoga practices and benefits.
- Developed features allowing users to explore various available yoga courses for easy accessibility.
- Implemented a user-friendly booking form for yoga classes, enhancing user engagement and interaction.

School Management System | Laravel, Tailwind CSS, React, Inertia

- Developed a School Management System using Laravel and MySQL for structured data handling.
- Integrated key modules for managing students, teachers, classes, and academic records.
- Implemented secure role-based access for admins, teachers, and students.
- Designed a clean, responsive user interface using Tailwind CSS for smooth usability across devices.
